### Macroeconomics A Contemporary Introduction 5th

Macroeconomics (from the Greek prefix makro-meaning "large" + economics) is a branch of economics dealing with performance, structure, behavior, and decision-making of an economy as a whole. For example, using interest rates, taxes, and government spending to regulate an economy's growth and stability. This includes regional, national, and global economies.

### Macroeconomics - Wikipedia

"Mankiw and Taylor's Economics is a well written, accessible, and contemporary introduction to a broad range of key economic theories and applications. The mix of theory and numerous examples helps to bring economics to life.

In economics, stagflation or recession-inflation is a situation in which the inflation rate is high, the economic growth rate slows, and unemployment remains steadily high. It presents a dilemma for economic policy, since actions intended to lower inflation may exacerbate unemployment. The term, a portmanteau of stagnation and inflation, is generally attributed to Iain Macleod, a British ...
