Extrinsic factors such as parent material, climate, topography and hydrology may influence potential values of soil properties to such a degree that it is impossible to establish universal target values, at least not in absolute terms. Soil quality assessment thus needs to include baseline or reference values in order to enable identification of management effects.

Origem dos sistemas de CRM. O conceito de Customer relationship management surgiu no início dos anos 70, quando a satisfação dos clientes era avaliada por meio de pesquisas anuais. Nessa época as empresas dependiam dos computadores Mainframe para automatização de vendas, mas essa tecnologia permitia que eles categorizassem os clientes em planilhas e listas.

Project management office (PMO) is a department or office that is responsible for the standardization of project management processes, and for providing support, resources, and training to project managers. It is a key component of an organization's project management infrastructure, and is responsible for ensuring that projects are completed on time, within budget, and to the satisfaction of the client.

Biodiversity - Wikipedia

Biodiversity is fundamental for ecosystem functioning, but little is known about how function responds to biodiversity loss following habitat disturbance in natural systems.

Peritonitis Rate. We recommend that every program should monitor, at least on a yearly basis, the incidence of peritonitis (IC).. We recommend that the parameters monitored should include the overall peritonitis rate, peritonitis rates of specific organisms, the percentage of patients per year who are peritonitis-free, and the antimicrobial susceptibilities of the infecting organisms (IC).
