In industrial engineering, the standard time is the time required by an average skilled operator, working at a normal pace, to perform a specified task using a prescribed method. It includes appropriate allowances to allow the person to recover from fatigue and, where necessary, an additional allowance to cover contingent elements which may occur but have not been observed.

Tesla is one of the most amazing success, and failure, stories in the history of automotive. There were a good many mavericks who tried to revolutionize auto, only to fail dramatically, such as the Tucker 48. But Tesla was even more bold, forging a new automotive segment, and just as it appears to be headed for free fall it magically rises to a new level of performance.
