The effects of global warming are the environmental and social changes caused (directly or indirectly) by human emissions of greenhouse gases. There is a scientific consensus that climate change is occurring, and that human activities are the primary driver. Many impacts of climate change have already been observed, including glacier retreat, changes in the timing of seasonal events (e.g ...

The Year 2000 problem, also known as the Y2K problem, the Millennium bug, the Y2K bug, or Y2K, is a class of computer bugs related to the formatting and storage of calendar data for dates beginning in the year 2000. Problems were anticipated, and arose, because many programs represented four-digit years with only the final two digits — making the year 2000 indistinguishable from 1900.

Year 2000 problem - Wikipedia

Abstract. This paper takes the hard-learned lessons from a gritty, down-in-the-mud historical project and applies them to today's projects. It analyzes the project that planned and executed the escape from Stalag Luft III, in an inhospitable and escape-proof environment designed to stop such a contemplation dead in its tracks.

The base of pastel chalks is calcium sulfate (CaSO_4), which is derived from gypsum ($\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$), an evaporite mineral formed by the deposition of ocean brine; it also occurs disseminated in limestone. Chalk and dehydrated gypsum thus have similar origins and properties. Pastels also contain clays and oils for binding, and strong pigments.
