Mechanical Ventilation David Chang 3rd

The role of noninvasive ventilation (NIV) in acute severe asthma is not well defined.^{6, 7, 8} A review of NIV in respiratory failure found only level C evidence to support a role for NIV in asthma and recommended that its use be limited to a minority of patients who are carefully selected and monitored. ⁸ Nonetheless, a recent analysis of a national database documented increasing use of NIV for ...

Mechanical Ventilation for Severe Asthma - ScienceDirect

Tracheostomy is an operative procedure that creates a surgical airway in the cervical trachea. [1, 2] It is most often performed in patients who have had difficulty weaning off a ventilator, followed by those who have suffered trauma or a catastrophic neurologic insult. [] Infectious and neoplastic processes are less common in diseases that require a surgical airway.

Tracheostomy: Background, Indications, Contraindications

The original list of "One Hundred Useful References in Pediatric Cardiac Intensive Care" was compiled by Anthony Chang, MD, MBA, and the Board of Directors of the Pediatric Cardiac Intensive Care Society (PCICS) in 2004.

The respiratory system (also respiratory apparatus, ventilatory system) is a biological system consisting of specific organs and structures used for gas exchange in animals and plants. The anatomy and physiology that make this happen varies greatly, depending on the size of the organism, the environment in which it lives and its evolutionary history.
