Pediatric physal fractures have traditionally been described by the five-part Salter-Harris classification system. Type I fractures occur through the growth plate. These injuries may present with normal radiographs, and the diagnosis is often made clinically when tenderness is palpated over the growth plate.

**Learn about Salter-Harris fractures with a Medcomic**

Healthcare Facilities. Pulmonary hypertension (PH) refers to increased pressure in the pulmonary circulation. It develops when pulmonary vessels become constricted and/or obstructed, which can occur in a wide variety of conditions. The increase in pressure is measured by right catheterization, and is defined as a mean ...
