There have been several other great improvements to the table level of Access. One of them is the introduction of two new field data types. One of these two data types is a multi-value field. Eliminating long workarounds of the implementation of many-to-many relationships this data type easily allows the creation and usage of a multi value list, which is somewhat expected from its given name.

Note: If you want to type in a non-Latin-based language, such as Arabic or Chinese, you can switch the keyboard layout with the Language bar. When you change the keyboard layout, Office changes the spelling and grammar language for you. For more information, see Enable or change the keyboard layout language.

The Mail Merge Toolkit dialogue looks very similar to the standard Microsoft Office box "Merge to Electronic Mail". In that box, like in the standard one, you can choose the data field containing recipient addresses, set message subject (btw, in Mail Merge Toolkit you can use automatic data field insertion like in a document text), set the format, and choose files to be attached to each ...
