The planning. In all research, it is essential to begin by clarifying what the researcher wants to find out, from whom and how. The purpose may be of a descriptive or exploratory nature based on inductive or deductive reasoning. Inductive reasoning is the process of developing conclusions from collected data by weaving together new information into theories.

The U.S. health care delivery system has been changing dramatically during the past 40 years. Economic changes around the world and the passage of the Affordable Care Act of 2010, as well as the resulting political responses, have focused the country's attention on the need to revise the U.S. health care system to improve access and quality while reducing the delivery costs.
