Multiple Choice Questions (MCQ) of Computer Networking ...

One of the reasons multiple choice questions are so difficult is that they're often designed to be intentionally misleading. On a multiple choice test you may have to decipher complicated statements just to understand the question before you even start trying to find the correct response.. An overuse of negatives is one way that test designers try to trip up students.

How to Deal With Negatives in Multiple Choice Questions ...

Figure 5. The figure above shows the graph of the function f , defined by for all numbers x . For which of the following functions g , defined for all numbers x , does the graph of g intersect the graph of f ? Explanation. You can see that all five choices are linear functions whose graphs are lines with various slopes and y -intercepts. The graph of Choice A is a line with slope 1 and y -intercept ...
