- NATO Specialist Team formed from industry and government to develop the standard
- USN (PMA-263) is STANAG 4586 custodian.

### **STANAG 4586 - Enabling Interoperability - AVCS**

Work is proceeding within NATO toward establishing STANAG 4686, which would define the performance levels of armoured vehicles' active protection systems. This would be in addition to the existing, well-established standardisation agreements embodied in STANAG 4569 on the levels of ballistic protection of armoured vehicles and the threat of blast mines to them.
