West Los Angeles College has the largest Distance Learning Program in the Los Angeles Community College District, offering online/hybrid degree and certificate programs to students worldwide.

Schedules | WLAC Distance Learning

This site is intended as a resource for university students in the mathematical sciences. Books are recommended on the basis of readability and other pedagogical value. Topics range from number theory to relativity to how to study calculus.

Books in the Mathematical Sciences

In numerical analysis, fixed-point iteration is a method of computing fixed points of iterated functions.. More specifically, given a function defined on the real numbers with real values and given a point in the domain of , the fixed point iteration is + = (), =,,, ... which gives rise to the sequence,,, ... which is hoped to converge to a point .If is continuous, then one can prove that the ...

Fixed-point iteration - Wikipedia

In mathematics, a stiff equation is a differential equation for which certain numerical methods for solving the equation are numerically unstable, unless the step size is taken to be extremely small.It has proven difficult to formulate a precise definition of stiffness, but the main idea is that the equation includes some terms that can lead to rapid variation in the solution.

The purpose of this page is to provide resources in the rapidly growing area of computer-based statistical data analysis. This site provides a web-enhanced course on various topics in statistical data analysis, including SPSS and SAS program listings and introductory routines. Topics include questionnaire design and survey sampling, forecasting techniques, computational tools and demonstrations.
