Python is an interpreted, high-level, general-purpose programming language. Created by Guido van Rossum and first released in 1991, Python has a design philosophy that emphasizes code readability, notably using significant whitespace. It provides constructs that enable clear programming on both small and large scales. Van Rossum led the language community until July 2018.

### **Python (programming language) - Wikipedia**

A goal is an idea of the future or desired result that a person or a group of people envisions, plans and commits to achieve. People endeavor to reach goals within a finite time by setting deadlines.. A goal is roughly similar to a purpose or aim, the anticipated result which guides reaction, or an end, which is an object, either a physical object or an abstract object, that has intrinsic value

Introduction. It's not news that STEM talents are in great demand and are paid well. Online postings for software jobs across the U.S. grew 31% from 2007 to 2012 - nearly 3x faster than overall job postings. The US Bureau of Labor Statistics estimates software developer jobs to continue to grow at 22% from 2012~2022, with a median pay of \$100,080 for software app developers as of May 2016.
