

Our Final Invention Artificial Intelligence And The End Of The Human Era

Our Final Invention Artificial Intelligence

A superintelligence is a hypothetical agent that possesses intelligence far surpassing that of the brightest and most gifted human minds. "Superintelligence" may also refer to a property of problem-solving systems (e.g., superintelligent language translators or engineering assistants) whether or not these high-level intellectual competencies are embodied in agents that act in the world.

Superintelligence - Wikipedia

The Allen Institute for Artificial Intelligence (abbreviated AI2) is a research institute founded by late Microsoft co-founder Paul Allen. The institute seeks to achieve scientific breakthroughs by constructing AI systems with reasoning, learning, and reading capabilities. Oren Etzioni was appointed by Paul Allen in September 2013 to direct the research at the institute.

Allen Institute for Artificial Intelligence - Wikipedia

Currently, robots, Artificial Intelligence, and machine learning systems (hereinafter referred to collectively as AI or AI systems) can create inventions, which, had they been created by humans, would be eligible for patent protection.

Barometer, device used to measure atmospheric pressure. Because atmospheric pressure changes with distance above or below sea level, a barometer can also be used to measure altitude. There are two main types of barometers: mercury and aneroid. In the mercury barometer, atmospheric pressure balances a column of mercury, the height of which can be precisely measured.
