### **Oxygen Administration For Divers**

Oxygen therapy, also known as supplemental oxygen, is the use of oxygen as a medical treatment. This can include for low blood oxygen, carbon monoxide toxicity, cluster headaches, and to maintain enough oxygen while inhaled anesthetics are given. Long-term oxygen is often useful in people with chronically low oxygen such as from severe COPD or cystic fibrosis.

### **Oxygen therapy - Wikipedia**

Oxygen toxicity is a condition resulting from the harmful effects of breathing molecular oxygen (O<sub>2</sub>) at increased partial pressures. Severe cases can result in cell damage and death, with effects most often seen in the central nervous system, lungs, and eyes. Historically, the central nervous system condition was called the Paul Bert effect, and the pulmonary condition the Lorrain Smith effect ...

The submerged-diver-rescue decision tree is a graphical representation of the various points the committee addressed. In the initial phase, the discussion focused on what to do if the regulator or rebreather mouthpiece had come out of the diver's mouth and, if it was still in place, whether the diver was experiencing a convulsion.

Plastic debris at the micro-, and potentially also the nano-scale, are widespread in the environment. Microplastics have accumulated in oceans and sediments worldwide in recent years, with maximum concentrations reaching 100 000 particles m<sup>3</sup>. Due to their small size, microplastics may be ingested by low trophic fauna, with uncertain consequences for the health of the organism.
