These days, vehicle repairing on a commercial basis requires only a small but declining number

# Access Free Panel Beater Manuals

of traditional panel beaters. The reasons for this decline are economic: panel beating is labour intensive and in the vehicle-repair industry it is far cheaper to strip off a damaged wing and replace it with a new one (unless the damage is very minor), than to employ a panel beater on time-consuming ...

The panel beater uses a special hammer to press out the damaged metal and restore the original shape. The panel is pushed against a shaping tool - called a "dolly" or "skate", which matches the original contours of the panel. Panel beaters will use welding equipment to join pieces of metal together.
