Pediatrics: Cardiac Disease and Critical Care Medicine

Pediatrics (also spelled paediatrics or pædiatrics) is the branch of medicine that involves the medical care of infants, children, and adolescents. The American Academy of Pediatrics recommends people be under pediatric care up to the age of 21. A medical doctor who specializes in this area is known as a pediatrician, or paediatrician. The word pediatrics and its cognates mean "healer of ...

William MacNee, in Clinical Respiratory Medicine (Fourth Edition), 2012. Lung Volumes. Static lung volumes such as TLC, residual volume (RV) and FRC, and the ratio RV/TLC are measured in patients with COPD, to assess the degree of overinflation and gas trapping, and are usually increased. These measurements are not necessary in every patient. The standard method of measuring static lung ...
