Physician Assistant Studies | University of Mount Union

Abstract While much is known about the prevalence of burnout among physicians and nurses, little is known about burnout in the physician assistant (PA) profession. Approximately 50 percent of physicians and 35 percent of nurses report symptoms of burnout. Burnout is linked to increased health care costs, medical errors, and poor patient outcomes.

Several recent studies have documented the compensation inequity between male and female physicians. A 2017 survey found that male primary care physicians made \$229 000 annually, compared with \$197 000 for women, a gap of 16% (). This gap is even wider (37%) for specialists: Men earned \$345 000 annually and women \$251 000.

Achieving Gender Equity in Physician Compensation and ...
