Print out this worksheet and use it, as well as the information following, to help you determine how, when and where you want to use an RV. This information may help you minimize costly mistakes.

RV Planning Worksheet - RV Buyers Guide

The most economical way to supply power during a power outage is to use a portable generator of the appropriate wattage for your needs (at least 4000 Watts for starters) and run extension cords into the house to power chosen appliances. A safer system is to have an electrician install a power transfer switch, connected to the house's main electrical panel.
