Radio stuck in "SAFE" mode (won't let me put in my code) I recently had some battery mis-connection issues, whereupon each time I would have to re-enter my radio code to get out of "Safe" mode. The last time, however, my girlfriend entered the incorrect code twice in a row, and now it doesn't even prompt for the code anymore after pressing and ...

Hey everyone, so I recently bought a new radio (RCD310) for my '08 Rabbit so I could enable bluetooth. I got the radio in and everything, but when I tried turning it on, it asked me for a four digit code to take off safe mode. Now, I bought the radio from a junkyard, so it is legit, but I don't think I have access to a VIN number.

OK, so here is my problem... I had to change my battery and when I hooked up the new one, the radio went into safe mode. I have my code and I tried looking around on the internet but I couldn't find which buttons to press and hold before entering it. I tried a few ones, and I guess it registered them as attempts. Now my radio reads "SAFE" and "2" and I'm not sure how to reset it.

**VWVortex.com - Golf Radio in safe mode... something is odd.**

Blaupunkt 300 radio in SAFE mode after battery change. Tried to reset, used wrong code 4 times. Now press AS button, power on, still in SAFE mode. Have left off for some days now, also left on but radio switches off after 20 mins or so. Any suggestions how to go from SAFE mode to recode mode? many thanks. George

On fait l'autoradio me demande depuis 2 jours le code, a force de toucher les boutons j'ai entré de mauvais code. j'ai appelé ancien proprio et il m'a donné le code. J'usque la tout va bien. Mais maintenant que j'ai le code l'autoradio reste bloqué, a chaque fois que je l'allume il marque CODE SAFE 2, je n'arrive plus a taper le code.
