A coral reef is an underwater ecosystem characterized by reef-building corals. Reefs are formed of colonies of coral polyps held together by calcium carbonate. Most coral reefs are built from stony corals, whose polyps cluster in groups. Coral belongs to the class Anthozoa in the animal phylum Cnidaria, which includes sea anemones and jellyfish. Unlike sea anemones, corals secrete hard carbonate ...

One little note about my "buy now" button system: paypal keeps track of inventory, which means each frog can only be purchased once. Unfortunately the system has a major flaw: until I manually remove the button after the item has sold, you won't know whether something is still available until you actually CLICK on the button.
