Size & Bundle Charts | Bull Moose Tube

A fitting is used in pipe systems to connect the straight pipe or tubing sections, adapt to different sizes or shapes and for other purposes, such as regulating (or measuring) fluid flow. "Plumbing" is generally used to describe the conveyance of water, gas, or liquid waste in domestic or commercial environments; "piping" is often used to describe the high-performance (high-pressure, high-flow ...

The difference between pipes and tubes is simply in the way it is sized. PVC pipe for plumbing applications and galvanized steel pipe for instance, are measured in IPS (iron pipe size).Copper tube, CPVC, PeX and other tubing is measured nominally, which is basically an average diameter. These sizing schemes allow for universal adaptation of transitional fittings.

Plumbing - Wikipedia

I know you're here looking for the best copper nickel pipes and a manufacturer you can trust. Oh, yes - you're just in the right place. Because in this guide, I am going to walk you through very important information about copper nickel pipes.
