## **Analytics, Business Intelligence and Data Management | SAS**

Analyze any kind and size of data using the latest statistical techniques. SAS/STAT includes exact techniques for small data sets, high-performance statistical modeling tools for large data tasks and modern methods for analyzing data with missing values.

## **Statistical Analysis Software, SAS/STAT | SAS**

My experience SPSS is better than the others by far in terms of flexibility, user friendliness, user interface. It is popular in academia as compared to SAS and R. R is Ok but you have to know lots of things before you feel comfortable with it, and there are too many packages which are confusing some times.

Lukas and I were trying to write a succinct comparison of the most popular packages that are typically used for data analysis. I think most people choose one based on what people around them use or what they learn in school, so I've found it hard to find comparative information.

## **Comparison of data analysis packages: R, Matlab, SciPy ...**

SPSS Statistics is a software package used for interactive, or batched, statistical analysis. Long produced by SPSS Inc., it was acquired by IBM in 2009. The current versions (2015) are named IBM SPSS Statistics.. The software name originally stood for Statistical Package for the Social Sciences (SPSS), reflecting the original market, although the software is now popular in other fields as well ...
