Our high-performance, powerful SIEM solution brings event, threat, and risk data together to provide strong security intelligence, rapid incident response, seamless log management, and compliance reporting—delivering the context required for adaptive security risk management.

### **Security Information & Event Management (SIEM) Solutions ...**

What is a SIEM? To give you the simplest answer, SIEM or Security Information and Event Management is defined as a complex set of technologies brought together to provide a holistic view into a technical infrastructure. Depending on who you talk to, there are about five different popular opinions on what the letters stand for.

### **What is a SIEM (Security Information and Event Management)?**

Security information and event management (SIEM) technology supports threat detection and security incident response through the real-time collection and historical analysis of security events from a wide variety of event and contextual data sources. It also supports compliance reporting and incident investigation through analysis of historical data from these sources.

### **Security information and event management - SIEM - Gartner**
