Socio Economic Perspectives In Early

Socioeconomic status (SES) is an economic and sociological combined total measure of a person's work experience and of an individual's or family's economic and social position in relation to others, based on household income, earners' education, and occupation are examined, as well as combined income, whereas for an individual's SES only their own attributes are assessed.

Socioeconomic status - Wikipedia

A social class is a set of subjectively defined concepts in the social sciences and political theory centered on models of social stratification in which people are grouped into a set of hierarchical social categories, the most common being the upper, middle and lower classes. "Class" is a subject of analysis for sociologists, political scientists, anthropologists and social historians.

Social class - Wikipedia

A considerable body of evidence has established that individuals of low socioeconomic status are more likely to suffer from disease, to experience loss of functioning, to be cognitively and physically impaired, and to experience higher mortality (Adler et al., 1993, 1994; Marmot et al., 1997b ...

Agriculture is considered the backbone of Pakistan's economy, which relies heavily on its major crops. There are vast gaps between the acquired and actual output of produce, which suffers due to a lack of appropriate technology, use of inputs at improper times, unavailability of water and land use and inadequate education about insect pest control, which not only negatively affects the produce ...
