Richard Matthew Stallman (/ ' s t ɔ : l m ə n /; born March 16, 1953), often known by his initials, RMS, is an American free software movement activist and programmer.He campaigns for software to be distributed in a manner such that its users receive the freedoms to use, study, distribute and modify that software.

Richard Stallman - Wikipedia

A computer is a device that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming.Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.

The PSR800 is (was) GRE's introduction to the "simple" digital scanner made for people with limited programming knowledge. The menus are fairly simple but not all self explanatory. We now have unlimited memory available on a microSD card along with the RadioReference Data Base for the US and Canada.Like the PSR500/310, the PSR800 uses Object Oriented Memory for storing channels but now has 201 ...

I'm using Python 2 to parse JSON from ASCII encoded text files.. When loading these files with either json or simplejson, all my string values are cast to Unicode objects instead of string objects. The problem is, I have to use the data with some libraries that only accept string objects. I can't change the libraries nor update them.. Is it possible to get string objects instead of Unicode ones?

The RTL-SDR can be used as a super cheap real time air radar. Modern planes use something called an ADS-B (Automatic Dependent Surveillance-Broadcast) Mode-S transponder, which periodically broadcasts location and altitude information to air traffic controllers. The RTL-SDR can be used to listen to these ADS-B signals, which can then be used to create your very own home aircraft radar system.

RTL-SDR Tutorial: Cheap ADS-B Aircraft RADAR

Pentium 4 - Generation 7 or complete stupidity?. I had been studying Intel's publicly available white papers on the Pentium 4 for the good part of 6 months prior to its release. While the new architecture looked promising on paper, the actual implementation of the Pentium 4 is a castrated version of the ideal chip that Intel set out to design.
