Classical physics refers to theories of physics that predate modern, more complete, or more widely applicable theories. If a currently accepted theory is considered to be modern, and its introduction represented a major paradigm shift, then the previous theories, or new theories based on the older paradigm, will often be referred to as belonging to the realm of "classical physics".

A physics engine is computer software that provides an approximate simulation of certain physical systems, such as rigid body dynamics (including collision detection), soft body dynamics, and fluid dynamics, of use in the domains of computer graphics, video games and film. Their main uses are in video games (typically as middleware), in which case the simulations are in real-time.

Wave2Wave was founded in 2003 in Silicon Valley with the focus on data center cabling and has since become a world leader in physical layer network connectivity with automation. With robotic fiber cross-connects, Wave2Wave virtualizes physical connectivity to help drive efficiency, reduce cost and eliminate human errors, while accelerating time to revenue.
