I had no clue, but found this on the internet: Solutions engineers are network engineers who provide solutions to a variety of problems that occur with software or hardware. When customers have a task that they want to accomplish and their network technology is not sufficient, the solutions engineer comes up with solutions that are sold to the customer.. Hope this helps you more than it did me.

Blinn was established as Mission Institute in 1883 by the Southern German Conference of the Methodist denomination. It became coeducational in 1888 when it began admitting women. In 1889, the institute's name was changed to Blinn Memorial College in honor of the Reverend Christian Blinn of New York, who had donated a considerable sum of money to make the school possible.

In continuum mechanics, stress is a physical quantity that expresses the internal forces that neighbouring particles of a continuous material exert on each other, while strain is the measure of the deformation of the material. For example, when a solid vertical bar is supporting an overhead weight, each particle in the bar pushes on the particles immediately below it.
