30° swing, spring hangers To complete an envelope, secondary walls must be introduced with the same consideration given to mass and air gap as covered in the floor discussion. The problem is simpler, because the walls normally support only their own weight and they need not have the structural strength of the floor.

Spring REST Docs Overview. The primary goal of this project is to make it easy to document RESTful services by combining content that's been hand-written using AsciiDoctor with auto-generated examples produced with the Spring MVC Test framework. The result is intended to be an easy-to-read user guide, akin to GitHub's API documentation for example, rather than the fully automated, dense API ...
