Student Exploration Covalent Bonds Activity

Student Exploration: Covalent Bonds Vocabulary: covalent bond, diatomic molecule, Lewis diagram, molecule, noble gases, nonmetal, octet rule, shell, valence, valence electron. Prior Knowledge Questions (Do these BEFORE using the Gizmo.) 1. There are eight markers in a full set, but Flora and Frank each only have seven markers.

Covalent Bonds. Choose a substance, and then move electrons between atoms to form covalent bonds and build molecules. Observe the orbits of shared electrons in single, double, and triple covalent bonds. Compare the completed molecules to the corresponding Lewis diagrams. Use for 5 minutes a day.

Student Activity. Have students break up into small groups. In each group, have students discuss and compare their notes with each member of the group. Have students try to explain Ionic Bonding. Have students try to explain Covalent Bonding. Play the song again to allow students an opportunity to add to their explanations of both bond types.

Covalent Bonds Exploration Guide - Gizmos Exploration Guide... For most atoms, a full outer energy level contains 8 valence electrons. In a covalent bond, two atoms share one (or more) pairs of electrons. The two electrons in that pair act as if they are in the outer energy level of both atoms at the same time,...

Ionic Bonds. Simulate ionic bonds between a variety of metals and nonmetals. Select a metal and a nonmetal atom, and transfer electrons from one to the other. Observe the effect of gaining and losing electrons on charge, and rearrange the atoms to represent the molecular structure. Additional metal and nonmetal atoms can be added to the screen,...
