### **Swop Colors Resolution Test Cmyk**

Resolution. Storing visual information as raster or vector data has an important impact on how that image gets displayed at different sizes. Raster data is resolution dependent. Because there are a finite number of pixels in the image, displaying the image at a particular size results in an image with a particular resolution, usually described as dots per inch (dpi) or pixels per inch (ppi).

The dreaded out-of-gamut-color phenomenon can account for a great deal of a monitor-to-print frustration:. The above Granger Chart rollover clearly illustrates the technical and artistic challenges involved with 'matching' a monitor preview to a print — in this example — the brilliant RGB source color gamut is compared in a rollover after converting it to a common CMYK print Space (US Web ...

4. Resolving Color values. Various properties accept <color> values. Unless an exception is explicitly defined, all such properties must resolve color values as defined below to determine the computed value and the used value for <color>.. If currentcolor is the specified value of the color property, it is treated as if the specified value was inherit.. For all other properties that accept a ...
