Child mortality, also known as child death, refers to the death of children under the age of 14 and encompasses national mortality, under-5 mortality, and mortality of children aged 5-14. Many child deaths go unreported for a variety of reasons, including lack of death registration and lack of data on child migrants.

Distinctions between scopes of practice for APNs are closely tied to each specialty certification. For example, by virtue of formal education, clinical training, and national certification, Family Nurse Practitioners (FNPs) are certified to treat patients of either sex across the lifespan, while certification in Adult-Gerontology allows the CRNP to treat patients of either sex, but only from ...
