The term phonation has slightly different meanings depending on the subfield of phonetics. Among some phoneticians, phonation is the process by which the vocal folds produce certain sounds through quasi-periodic vibration. This is the definition used among those who study laryngeal anatomy and physiology and speech production in general. Phoneticians in other subfields, such as linguistic ...

What is the cause of Darier disease? The abnormal gene in Darier disease has been identified as ATP2A2, found on chromosome 12q23-24.1. This gene codes for the SERCA enzyme or pump (SarcoEndoplasmic Reticulum Calcium-ATPase) that is required to transport calcium within the cell. The exact mechanism by which this abnormal gene causes the disease is still under investigation but it appears that ...
