Solvents - Marine And Industrial

Water-based coatings vs. solvent-based coatings. Coatings frequently take their name from the binder, or resin, from which they're made. Epoxies, alkyds and urethanes are all examples of resins that give a coating their name. But these aren't the only parts that make up a coating.

Water-based coating vs. solvent-based coating | US Coatings

Intumescent Coatings: A Review of Current and New Technologies A commercial building's structural support steel may not have exterior exposure, or even be visible inside the building, but in some cases — such as The New York Times building in Manhattan — it is part of the exterior facade.
