The Beginning of the Forging Process. Bronze and iron went through the forging process by the early man to produce hand tools, weapons of war, and jewelry. However, the very first recorded metal, forged by fire and employed by humans was Gold. To shape the metal, rock was used as a forging hammer. Until the end of the 19th century, the precision forging of iron and steel continued.

The blows are delivered with a hammer (often a power hammer) or a die. Forging is often classified according to the temperature at which it is performed: cold forging (a type of cold working), warm forging, or hot forging (a type of hot working). For the latter two, the metal is heated, usually in a forge.

**Forging - Wikipedia**

In what has established itself as a classic study of Britain from the late eighteenth century to the mid-Victorian period, Eric J. Evans explains how the country became the world's first industrial nation. His book also explains how, and why, Britain was able to lay the foundations for what became ...
