IB Geography. Degrees of freedom are an abstract mathematical notion used in some statistical calculations. While calculating and using degrees of freedom in statistics is extremely simple, this notion is difficult to grasp for non experts. However you do NOT need to fully understand the underlying meaning of this concept in order to use it:

Harvey begins with an insightful critique of the political uses of freedom and liberty, especially during the George W. Bush administration. Then, through an ontological investigation into geography's foundational concepts space, place, and environment he radically reframes geographical knowledge as a basis for social theory and political action.
