The God Species Mark Lynas

I just finished Mark Lynas's "The God Species: How the Planet can Survive in the Age of Humans." I read his Six Degrees late last year and recommended it highly. Six Degrees is specifically a well-done survey of climate change research. The God Species is a broader look at challenges to the planet that follows the planetary boundaries research.

The God Species: Saving the Planet in the Age of Humans ...

The God Species. In 2008 Mark Lynas attended a meeting of leading scientists in Sweden when it suddenly dawned on him that what was being discussed represents a revolutionary new approach to maintaining the life of, and life on, our planet. This book examines this topic.

The God Species by Mark Lynas - review | Science and ...

We humans are the God species, both the creators and destroyers of life on this planet. As we enter a new geological era - the Anthropocene - our collective power now overwhelms and dominates the major forces of nature. But from the water cycle to the circulation of nitrogen and carbon through the entire Earth system, we are coming dangerously close to destroying the planetary life-support systems that sustain us.
