The prioritization matrix is a great tool, but it is not used much. The reason is probably because it

takes a lot of time to do manually, and it can be confusing. To make it more usable, this article provides an automated template for using the tool.

While there is no one path to becoming a CBAP® and the path you take depends heavily on the time you wish to invest, your budget, and your timeline for becoming certified, there are some general phases of preparation that each individual seems to pass through. For some, all of this happens in a week or two with a Boot Camp type class. For others, this process is spread out over a year or two ...

Lean manufacturing or lean production, often simply "lean", is a systematic method for the minimization of waste (muda) within a manufacturing system without sacrificing productivity, which can cause problems. Lean also takes into account waste created through overburden (muri) and waste created through unevenness in work loads (mura).
