So You Need to Clean 'Interdentally'. What are the options? There are a few ways: Using dental floss, the most common and effective way for most people. Dental floss is nylon string. It can be either unwaxed or waxed, to help it run smoothly between the teeth.

Flossing Teeth and Cleaning Between Them - DentalCareMatters

A person's life has two dentition phases – Primary dentition, i.e. the Deciduous Teeth / Milk teeth and the Permanent Teeth which are seen for the entire lifetime. There are several differences between the Deciduous / Primary and Permanent teeth in the morphology and various other aspects, and it is the deciduous teeth which erupt first, then followed by the permanent teeth.

Differences between Primary Teeth (Milk Teeth) and ...

I was asked ever-so-nicely by a few readers on Instagram to recount all the juicy details of my experience with Invisalign, so hold onto your dental floss, we're about to talk teeth!. Invisalign are essentially clear, plastic mouthguards that move/ straighten/ work wonders on your teeth in the same way that traditional metal braces do.

What Causes Tooth Staining? Age: There is a direct correlation between tooth color and age.Over

the years, teeth darken as a result of wear and tear and stain accumulation. Teenagers will likely experience immediate, dramatic results from whitening.

Teeth Whitening | Risks, Results, Options and Cost Information

Air polishing is a procedure which uses air & water pressure to deliver a controlled stream of specially processed powders in a slurry through the handpiece nozzle. Fine particles of powders are propelled by compressed air in a warm spray and directed onto the surfaces of the teeth. This pressurized jet of air, water and powder removes surface stains, plaque and other soft deposits such as ...

AirFlow Therapy | Hu-Friedy

Brushing your teeth is not just for a whiter smile and fresher breath, it's critical for your overall health. When you brush, you remove plaque — a thin film of bacteria that sticks to your teeth and will create cavities, gum disease, and if you ignore it long enough, will cause your teeth to fall out!

How to Brush Your Teeth: 15 Steps (with Pictures) - wikiHow

I can not thank Dr Rabine enough for my smile. I never wanted to smile due to the spaces in between my teeth. I love my smile now, I get compliments daily and I always recommend people to the office.

Teeth Eruption Timetable - Cleveland Clinic

While it can vary somewhat between breeds, there is a progression you can expect as your puppy develops new teeth. It's important to begin handling your puppy's mouth while it's young so you can periodically check for any potential tooth problems. Any type of facial swelling, changes in eating habits, unexpected night awakenings, or rubbing of the face are signs of possible oral discomfort.

When Will My Puppy Stop and Start Teething?
