Last time we finished our examination of amines. Now we'll look at what happens when a carboxylic acid functional group and an amine functional group are in the same molecule. Our focus will be on the alpha amino acids, those in which the amino group is bonded to the alpha carbon -- the one next to the carbonyl group -- of the carboxylic acid.

A hydrogen bond is the attraction between the lone pair of an electronegative atom and a hydrogen atom that is bonded to either nitrogen, oxygen, or fluorine. The hydrogen bond is often described as a strong electrostatic dipole–dipole interaction. However, it also has some features of covalent bonding: it is directional, stronger than a van der Waals force interaction, produces interatomic ...

40 Responses to "How to Stake a Tree" Helen at Toronto Gardens Says: May 20th, 2009 at 8:48 pm. Good information. When I see saplings died down like the Lilliputians tied down Gulliver, I want to sneak in at night and liberate the tree.

How to Stake a Tree | Backyard Gardening Blog

Scientists believe that Global Warming will lead to a weaker Ozone layer, because as the surface temperature rises, the stratosphere (the Ozone layer being found in the upper part) will get colder, making the natural repairing of the Ozone slower.. NASA, for example, reports that by 2030, "climate change may surpass chlorofluorocarbons (CFCs) as the main driver of overall ozone loss."

The Ozone Layer and Climate Change — Global Issues

METEOROLOGIST JEFF HABY A complete understanding of latent heat will add greatly to your analysis and forecasting skills. Latent heat is nothing magical but can be very confusing to understand.
