

Theater Seating Design Guidelines

Theater Seating Design Guidelines

Bar seating is typically implemented in a home theater exactly as you might find it in a bar setting. There is a shallow depth bar behind the last row of recliners with a number of high bar stools with footrests used to provide seating.

Some home cinema enthusiasts build a dedicated room in their home for the theater. These more advanced installations often include sophisticated acoustic design elements, including "room-in-a-room" construction that isolates sound and provides an improved listening environment and a large screen, often using a high definition projector.

The idea is that people hear differently at different SPL levels – see the Fletcher Munson curves. Higher SPL sounds like more bass, lower SPL sounds like less bass, even if in both cases the spectral balance of the sound has not changed.

THX reference level explained - Acoustic Frontiers

2. GENERAL. 2.1 Provisions for Adults and Children. The specifications in these guidelines are based upon adult dimensions and anthropometrics. These guidelines also contain alternate specifications based on children's dimensions and anthropometrics for drinking fountains, water closets, toilet stalls, lavatories, sinks, and fixed or built-in seating and tables.
