Trimble Sync Manager (TSM) provides a survey focused interface for cloud-based data management between the office and the field. Part of the survey workflow, Surveyors can immediately start working in Trimble Access 2018 by downloading fully configured jobs including linked files such as DXF maps and CSV.

Trimble Sync Manager | Trimble Geospatial
Trimble is transforming the way work is done through the application of innovative positioning. Trimble uses GPS, lasers, optical, and inertial technologies, as well as wireless communications and application specific software to provide complete solutions that link positioning to productivity.

Trimble - Support
Trimble Access offers optional Streamlined Workflows to guide crews through common project types and improve data consistency. These specialized modules make data collection fast and easy. And they allow crews to focus entirely on the deliverables—instead of the software commands for each task along the way.
