Calculating fixed odds. It is customary with fixed-odds gambling to know the odds at the time of the placement of the wager (the "live price"), but the category also includes wagers whose price is determined only when the race or game starts (the "starting prices"). It is ideal for bookmakers to price/mark up a book such that the net outcome will always be in their favour: the sum of the ...

Fixed-odds betting - Wikipedia

Picking up where the original Against All Odds left off, the new series maintains the same emphasis on "doing" statistics. Each unit is based on a video module that introduces a statistical topic in real-world context and takes you on location to where people from all walks of life are using statistics in their work.

Resource: Against All Odds: Inside Statistics

Odds are a numerical expression, usually expressed as a pair of numbers, used in both gambling and statistics. In statistics, the odds for or odds of some event reflect the likelihood that the event will take place, while odds against reflect the likelihood that it will not. In gambling, the odds are the ratio of payoff to stake, and do not necessarily reflect exactly the probabilities.

Poker Pot Odds | Using Pot Odds In Poker

Learning how to calculate odds isn't as difficult as it may seem, so if you are having trouble, here is a quick explanation. Taking a 2/1 wager as an example, you can calculate the percentage chance of this ratio bet by adding the right-hand figure to that of the left, so in this case it would be one plus two equalling three.

Expected value is a very important concept in poker. When you make decisions that have a positive expected value you'll be profitable in the long run.

Understanding Expected Value | Pokerology.com

Donald Catlin: Last month, after explaining hold percentages, I remarked that there is no theoretical hold percentage for a game. I then went on to show the reason -- the whim of the player can affect the hold percentage. In my last paragraph, however, I claimed that if one makes an additional assumption about how a rational player might play, then one can calculate a hold percentage.

Calculating a Hold Percentage - Casino City Times

Based on the above information, you may decide not to play the Italian SuperEnalotto lottery, or even the American Powerball. You might instead consider buying tickets to a smaller lottery, such as New York's Lotto, because the odds of winning the jackpot of that state lottery are 1:45 million. Or you could buy Swiss Lotto tickets, as the odds of winning the Swiss jackpot are 1:31 million.
