

Using Cuisenaire Rods Learning Resources

Using Cuisenaire Rods Learning Resources

Cuisenaire rods are mathematics learning aids for students that provide an enactive, hands-on way to explore mathematics and learn mathematical concepts, such as the four basic arithmetical operations, working with fractions and finding divisors. In the early 1950s, Caleb Gattegno popularised this set of coloured number rods created by the Belgian primary school teacher Georges Cuisenaire ...

Cuisenaire rods - Wikipedia

We are the original and exclusive producers and distributors of the Cuisenaire ® Rods in the UK since 1954, and the publishers of the books for teachers and students by Dr Caleb Gattegno and Mme Madeleine Goutard. Here you will find videos of children working on mathematics; details of the sets of Rods and the texts available as well as numerous other resources for anyone wishing to know more ...

Manipulatives are objects that can be handled and moved. These range from everyday items such as buttons and shells, to resources like abacuses, Cuisenaire rods, and Dienes blocks.

Using Manipulatives in the Foundations of Arithmetic ...

Good morning! In Kindergarten and Grade 1, students need practice subitizing. That is, being able to recognize at a glance and name familiar arrangements of objects without counting. It's an important precursor to estimation, skip counting and multiplication, and depends on students' understandings of conservation -- that 5 is 5, no matter how it is...

Learning Disabilities in Mathematics. By: C. Christina Wright. With the awareness that math understanding is actively constructed by each learner, we can intervene in this process to advocate for or provide experience with manipulatives, time for exploration, discussion where the "right" answer is irrelevant, careful and accurate language, access to helpful technologies, and understanding and ...
