Measuring Belts. Belts are NOT measured by diameter nor folding the belt in half. The most accurate way to measure the circumference of a belt is with a v belt measuring tool or using a cloth tape measure (Not a steel tape measure or ruler). An additional option is to wrap a small diameter string/rope around the belt,...

Increase performance with better belt tracking. Guides come in different sizes with the size of the conveyor belt dictating the size of the v-guide. There should be a 1/16" clearance on both sides and bottom of the v-guide, it should not be snug in the groove. It is important to remember that v-guides only aid in tracking of a belt and cannot prevent tracking issues due to poor conveyor design.
