Water Treatment - Vecom Marine

Vecom takes care of the waste water processing of customers and third parties, both in small quantities (IBCs) and in bulk (tankers), using an DND installation. By using the waste to waste principle as much as possible when processing collected waste streams, the use of new auxiliary substances is limited as much as possible.

Products - Vecom Group

BOILER TREAT COMBI can also be dosed with HYDRAZIDE (oxygen scavenger) depending on the feedwater temperature and also CONDENSATE TREAT depending on the size of the condensate system and condensate pH. We strongly recommend using a VECOM MARINE dosing pump/tank unit.

Boiler Treat Combi | Vecom Marine

For good boiler water treatment we strongly advise using HYDRAZIDE as oxygen scavenger and CONDENSATE TREAT, or CONDENSATE CONTROL, for neutralising acids in the condensate system.

Boiler Treat One Shot | Vecom Marine

COOLTREAT NCLT should be dosed to the system by means of a VECOM MARINE dosing system. The dosing position should be where the circulation is at the highest. Do not add to expansion tank if there is little or no circulation. Systems contaminated with oil and/or scale should be cleaned before applying COOLTREAT NCLT treatment.

Cooltreat NCLT | Vecom Chemicals

Vecom Marine products can be divided in the following categories: Water Treatment, Fuel Oil Treatment, Engine Room & Deck Cleaners, Tank Cleaning, Cargo Hold Cleaning, Cruise Line & Accommodation, Specialty Products, Dosing & Monitoring Equipment, Refrigerant Gases, Welding Gases, Welding Equipment, Raw Materials.

Marine Chemicals product categories | Vecom Marine

Vecom ensures that the waste streams (also on-site) are collected and processed in its own waste water treatment plant, the DND plant. DND stands for Detoxification, Neutralization, Dewatering. Vecom is in fact authorized to act as a collector and processor of various metallic acids and bases, waste water, rinsing water, pickling baths, etc.

Leading in Metal Surface Treatment | Vecom Group

Waste water treatment In order to minimize the impact of released waste streams on the environment, Vecom adheres to the strict codes of practice which are clearly stated in their environment agency permit. The waste and residual streams are treated on site to neutralise any acid prior to discharge.
