Actually an Integrated design is where all the various elements of design are brought together into a coherent whole. An example of this is when a company undergoes a brand redesign from the ground up. They might change their logo, typography and colour palette to better represent the company's current ethos and values.

What is an integrated designer? - Quora

Jump to navigation Jump to search. Web design encompasses many different skills and disciplines in the production and maintenance of websites. The different areas of web design include web graphic design; interface design; authoring, including standardised code and proprietary software; user experience design; and search engine optimization.
