Websphere Application Server 8 Administration

Find out how IBM WebSphere Application Server helps you create, connect and optimize applications for any environment, whether on premises or on a public, private or hybrid cloud.

WebSphere Application Server | IBM Cloud

WebSphere Application Server (WAS) is a software product that performs the role of a web application server. More specifically, it is a software framework and middleware that hosts Java-based web applications. It is the flagship product within IBM's WebSphere software suite. It was initially created by Donald F. Ferguson, who later became CTO of Software for Dell.

Oracle WebLogic Server is a Java EE application server currently developed by Oracle Corporation. Oracle acquired WebLogic Server when it purchased BEA Systems in 2008.

Oracle WebLogic Server - Wikipedia

Contrary to the (currently) accepted answer, I argue that placing anything under WAS_HOME/classes is a discouraged practice. This directory is often used by IBM to place classes/JAR files that are considered "internal" to WAS and related products (for instance, certain versions of WebSphere Portal place JAR files in that directory).

best place to put properties file in IBM websphere 8.5?
