Don Hirose and a friend had an interesting argument. Don's friend was sure that when you eat an egg you're eating a baby chick, but Don didn't think so. They made a bet and came to A Moment ...

When You Eat An Egg Are You Eating A Baby Chick? | A ...

Baby chicks need either a heat lamp, a Brinsea, or a mama hen to keep them warm for about four to six weeks depending on the outside temperatures. Good luck raising your baby chicks now that you know how to keep them warm! Do you have any other tips when it comes to chicks and heat source? Let us know in the comments below!

How Long Do Baby Chicks Need a Heat Lamp or Heat Source?

Cluster of developing egg yolks in hen ovary. The two largest yolks are fully developed and would next break away from the ovary to begin the process of shell formation. Hens ovulate for the same reason female humans do: to reproduce. In chickens, the ovary is a cluster of developing ova, or yolks.
