Windows 8 Unattend Answer File

An unattend.xml (a.k.a. answer file) can be used during Windows setup to prevent all of the user interface (UI) pages from appearing in the Windows out-of-box experience (OOBE). This can be particularly useful when imaging computers with something like SCCM Task Sequences and the goal is to suppress OOBE after imaging.

Use Unattend.xml to Skip Windows 10 OOBE during an SCCM ...

1.) Value for processorArchitecture must be amd64 for 64 bit Windows on both AMD and Intel 64 machines, x86 for 32 bit Windows. Notice that the value can be found in three places in this answer file 2.) InputLocale is preferred, default keyboard layout, in this sample my default Finnish (040b:0000040b). UILanguage is the language of your Windows install media, in this sample British English (EN-GB).

EDIT: While this method still works, it has officially been deprecated by Microsoft. I write about the newer supported answer file in the article [Use Unattend.xml to Skip Windows 10 OOBE during an SCCM Task Sequence.. Successfully Tested On: Microsoft System Center Configuration Manager versions 2012 - 1903, Windows 10 Enterprise versions 1507 - 1903, Windows 10 Long-Term Servicing Branch ...](#)

Use Unattend.xml to Fix Windows 10 SCCM Image Stuck On ...

If the time zone is not specified, Windows creates a default time zone value that is based on the installed language and region that are specified in an answer file. If a region has more than one time zone, the default time zone for that region is specified by the location of a capital or a major city.

TimeZone | Microsoft Docs

Nice work Martin! Just one thing: the `cpi:offlineimage` line in answer file (highlighted below) is totally unnecessary, created by Windows SIM for reference purposes only, telling which image was used as reference to create answer file. It can be completely removed from all answer files ever created with Windows SIM. It does no harm if left in place, it's just that it is not needed nor required.
