According to some consumer reports, ZD30 engines (particularly newer ones) receive a bad reputation on reliability. The problems that have been experienced are cracks on the cylinder block as thin as a strand of hair and on a piston requiring a rebuild. The other problem is the ECU that doesn't give the engine its maximum performance.

The ZD30 engine was used right up until the end of Y61 production in 2016. The other problem suffered by the ZD30 was down to the actual engine's slow responses to commands from the computer. Typically, that manifested in damaging boost spikes where the computer detected an overboost situation, but the engine hardware was too slow to over-ride the situation.
